

## Photosynthesis takes place in the \_\_\_\_

| What do plants NEED to<br>photosynthesize?<br>(REACTANT) |  |  |  | What do plants MAKE in photosynthesis?<br>(PRODUCTS) |  |  |  |
|--|--|--|--|--|--|--|--|
| Words  |  |  |  |  |  |  |  |
| Formula  |  |  |  |  |  |  |  |
| Write the Chemical Equation for Photosynthesis           |  |  |  |  |  |  |  |
| Words:   |  |  |  |  |  |  |  |
| Formula:   |  |  |  |  |  |  |  |

## Cellular Respiration

Cellular Respiration takes place in the \_\_\_\_\_

What organisms perform cellular respiration?

| What is N  | EEDED for (<br>(REAC) | cellular respiration?<br>TANT) | What is MADE in cellular respiration?<br>(PRODUCTS) |  |  |  |  |
|--|-----------------------|--------------------------------|---|--|--|--|--|
| Words  |                       | C                              |   |  |  |  |  |
| Formula  |                       | E                              |   |  |  |  |  |
| Write the Chemical Equation for Cellular Respiration |                       |                                |   |  |  |  |  |
| Words:   |                       |                                |   |  |  |  |  |
| Formula:   |                       |                                |   |  |  |  |  |
