The Ins and Outs of Endosymbiosis How we think eukaryotic cells evolved.

Go to https://ed.ted.com/lessons/how-we-think-complex-cells-evolved-adam-jacobson or www.biologybynapier.com Evolution page, scroll down to bottom and click on ENDOSYMBIOSIS LINK

Watch the video and answer the following questions. Stop and/or rewind the video if you need to.

- 1. What were the first living organisms on earth?
- 2. What happened to the bacteria when it was absorbed by the single 'blob' prokaryotic cell?
- 3. What is endosymbiosis?
- 4. What two organelles did the different bacteria become?
