

Name: _____

Molecular Record

Scientists can examine the amino acid sequences of particular protein molecules found in vertebrates to determine the degree of similarity between vertebrate species. Even organisms that appear to have few physical similarities may have similar sequences of amino acids in their proteins and be closely related through evolution. Scientists believe that the greater the similarity in the amino acid sequences of two organisms, the more closely related they are in an evolutionary sense. Cytochrome-c is a protein found in the mitochondria that is used in cellular respiration. This protein consists of a chain of 104 amino acids. The chart below shows the amino acid sequence of nine vertebrates. The letters identify the name of the amino acid.

Animal	Amino Acid Sequences in Cytochrome-c																					
	A	B	C	D	E	F	G	H	I	J	K	L	M	N	O	P	Q	R	S	T	U	V
Horse	gln	pro	phe	thr	thr	ala	lys	asn	lys	thr	lys	glu	glu	thr	leu	met	glu	lys	ala	thr	asn	glu
Chicken	gln	glu	phe	ser	thr	asp	lys	asn	lys	thr	gly	glu	asp	thr	leu	met	glu	lys	ala	thr	ser	lys
Tuna	gln	glu	phe	ser	thr	asp	lys	ser	lys	val	asn	asn	asp	thr	leu	met	glu	ser	ala	thr	ser	--
Frog	gln	ala	phe	ser	thr	asp	lys	asn	lys	thr	gly	glu	asp	thr	leu	met	glu	ser	ala	cys	ser	lys
Human	gln	pro	tyr	ser	thr	ala	lys	asn	lys	ile	gly	glu	asp	thr	leu	met	glu	lys	ala	thr	asn	glu
Shark	gln	gln	phe	ser	thr	asp	lys	ser	lys	thr	gln	gln	glu	thr	leu	arg	ile	lys	thr	ala	ala	ser
Turtle	gln	glu	phe	ser	thr	glu	lys	asn	lys	thr	gly	glu	asp	thr	leu	met	glu	asp	ala	thr	ser	lys
Monkey	gln	pro	tyr	ser	thr	ala	lys	asn	lys	thr	gly	glu	asp	thr	leu	met	glu	lys	ala	thr	asn	glu
Rabbit	gln	val	phe	ser	thr	asp	lys	asn	lys	thr	gly	glu	asp	thr	leu	met	glu	lys	ala	thr	asn	glu

DATA

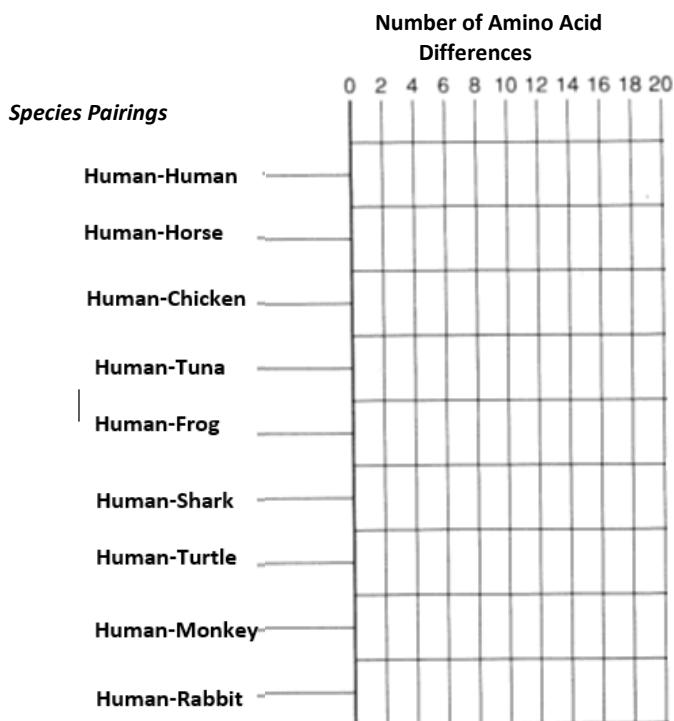

Compare the amino acid sequence of human cytochrome-c with that of the other eight vertebrates. For each vertebrate, count the number of amino acids that differ from those in the human and write the number in the chart to the right.

TABLE 1

Number of Amino Acid Differences from Human Cytochrome-c	
Species	Number Differences
Human	0
Horse	
Chicken	
Tuna	
Frog	
Shark	
Turtle	
Monkey	
Rabbit	

Graphing

In the space below construct a bar graph comparing the amino acid differences for the different organisms.

1. Based on the data gathered, which organisms appear to be most closely related to humans? Explain your answer.

2. Among the organisms compared, which one appears least closely related to humans? Explain your answer.

3. If the amino acid sequence in the proteins of two organisms is similar, why will their DNA also be similar?

4. Check the pair of organisms that appears to be most closely related to one another.

- _____ chicken- tuna
- _____ chicken-frog
- _____ chicken-turtle

Explain your answer.

DNA Differences Question

5 species of quail are being researched to compare the genetic sequence. Researchers isolated a section of DNA and determined the number of differences in that section of DNA. They recorded their observations in the table below which shows the number of differences in the isolated section.

	<i>A. bilificus</i>	<i>G. spontificus</i>	<i>Q. rondificus</i>	<i>U. rusticus</i>	<i>N. randomis</i>
<i>A. bilificus</i>					
<i>G. spontificus</i>	53				
<i>Q. rondificus</i>	34	56			
<i>U. rusticus</i>	46	17	11		
<i>N. randomis</i>	34	23	42	5	

Which 2 species are most closely related?

Which 2 species are least related?
