## Graphing Practice - PreAP Biology

- Use the graph paper to graph the following data tables.
- USE YOUR HANDWRITTEN COPY - FOLLOW THEM!!
- Answer the questions AFTER creating your graphs.

1. Baby chickens, like all baby birds, require a constant source of food. As chick grow, more energy is required for daily activities, and their food requirements increase. The following data table reports the average food eaten by a group of 10 chickens over a 5 -day period.

Baby Chicken Food Consumption

| Day | Food Consumed (g) |
| :---: | :---: |
| 0 | 0.0 |
| 1 | 1.0 |
| 2 | 3.2 |
| 3 | 6.5 |
| 4 | 10.6 |
| 5 | 15.4 |

## Questions

1. Identify the independent and dependent variables.
2. How much grain will the chicks eat on day 6 ?
3. On day 7 ?
4. What type of relation does the graph represent?
5. The data below summarizes the results of a scientific experiment on the effects of a growth hormone (gibberellic acid) on plant height. A 0.1 molar solution was used in all experiments.
Gibberellic Acid and Plant Height

| Gibberellic Acid $(0.1 ~ M)$ <br> $(\mathrm{mL})$ | Plant Height at <br> 1 Week $(\mathrm{cm})$ |
| :---: | :---: |
| 20 | 18.5 |
| 30 | 20.7 |
| 40 | 45.2 |
| 50 | 62.3 |
| 60 | 10.6 |

## Questions

1. Identify the independent and dependent variables.
2. Estimate the plant height at 10 mL gibberellic acid.
3. Estimate the plant height at 25 mL ?=.
4. Explain why the plant height at 60 mL is not consistent with the rest of the data.
5. A team of scientists wanted to test the effects of temperature on the germination rate of pinto beans. They placed three sets of 100 pinto bean seeds in temperature controlled chambers: Chamber A was set at $15^{\circ} \mathrm{C}$, chamber B at $20^{\circ} \mathrm{C}$, and chamber C at $25^{\circ} \mathrm{C}$. Their results are shown in Table 1 below:

Germination Rates of Pinto Beans

| Day | \% Germination <br> $\left(15^{\circ} \mathrm{C}\right)$ | \% Germination <br> $\left(20^{\circ} \mathrm{C}\right)$ | \% Germination <br> $\left(25^{\circ} \mathrm{C}\right)$ |
| :---: | :---: | :---: | :---: |
| 0 | 0 | 0 | 0 |
| 2 | 2 | 10 | 10 |
| 4 | 10 | 30 | 50 |
| 6 | 20 | 40 | 80 |
| 8 | 20 | 60 | 90 |
| 10 | 35 | 70 | 90 |

## Questions

1. Identify the independent and dependent variables.
2. Compare and contrast the growth rate of pinto beans at the different temperatures.
3. Summarize the experimental results.

THINK: How many lines do you graph? Do you need a key?
