

Name: _____

Cells and Virus Review Reflection

What I Should Be Able To Do

- Compare and contrast prokaryotic and eukaryotic cells
- Recognize and explain the different reproductive methods (life cycles) of viruses

Content Knowledge From Today

What does a eukaryote cell have that a prokaryote does not?

List the cell structures found in a prokaryotic cell.

What is the ONLY thing a virus has in common with a prokaryotic cell?

Briefly explain the difference between the lytic and lysogenic cycles.

How do viruses "infect" a cell and what do they do to the cell?

Name the cell HIV attacks and explain the life cycle of HIV.

How I Feel About Content After Today

- I know everything about this topic. I will get every question on this topic right on the exam.
- I know most of the information over this topic. I will get most questions on this topic right on the exam.
- I know some of the information over this topic. I will get some of the questions right on the exam.
- I know nothing over this topic. I will need to guess when I see a question over this topic on the exam.

What Are My Next Steps To Master the Content Before the Exam

What can I do at school?

What can I do at home?
